

TUgis

Maryland's Geospatial Conference

August 7–8, 2018 | Towson University

Public Safety Concurrent Conference: The Science of Where

One of the most important questions in public safety is 'Where?'

- Where is the call?
- Where is the hydrant?
- Where is the closest hospital?
- Where do I evacuate people to?

Find out what's new and learn how GIS technology can answer the 'Where' question at TUgis, the region's largest conference dedicated to GIS technology.

Focused exclusively for public safety officials, this concurrent conference will allow you to explore what's new in mapping in 9-1-1, police, fire, and emergency management in Maryland through specialized sessions, created for public safety officials. Topics range from user presentations, table top exercises, NG 9-1-1, and how the private sector supports public safety.

Don't miss this opportunity to network and better understand the science of where.

Program

10:00–11:00 a.m.	Paper and Web Maps: A Crawl, Walk and Run Approach to Public Safety GIS
11:00 a.m.–12:00 p.m.	Private Sector Support of Public Safety (NAPSG /ESRI)
12:00–1:30 p.m.	Lunch and Exhibit Hall Networking
1:30–2:00 p.m.	Exhibitor Showcase
2:00–3:00 p.m.	Maryland's Centralized Resource to Better NG911 Data Management
3:00–3:30 p.m.	Afternoon Break
3:30–4:30 p.m.	Table Top Exercise: How GIS can be used in an Emergency
